

PULENDRAN LAKSHAN

INTERN – SOFTWARE ENGINEER

(+94) 78 431 3791 — lakshanpulendran@gmail.com — Kalmunai, Sri Lanka — [Linkedin](#)

Dynamic and motivated BSc. (Hons.) Software Engineering student with a passion for building innovative web and mobile applications. Skilled in Flutter, Dart, JavaScript, React.js, and MERN stack technologies. Adept at developing scalable solutions and eager to contribute technical expertise to real-world projects while enhancing professional experience.

SKILLS

- Web & Mobile Application Development (Flutter, MERN Stack)
- Frontend Design (HTML, CSS, JavaScript, Figma, Photoshop)
- Backend Development (Node.js, Express.js, MongoDB, PHP, JSP)
- Tools: Visual Studio Code, GitHub, Google Colab, Figma
- Languages: English, Tamil

EDUCATION

Degree: BSc (Hons) in Software Engineering

National School of Business Management | Sri Lanka (2021-present)

General Certificate of Education (Advanced Level) Examination

Carmel Fatima College | Sri Lanka (2019) | Subjects & Results: Combined Maths [S], Physics [S], Chemistry [S]

Diploma : Level 3 Diploma in IT and English

Esoft Metro Campus | Sri Lanka (2018-2019)

PROJECTS

FoodShare – Full Stack Project

- Built a real-time food donation and matching platform using React.js, Node.js, Express.js, and MongoDB.
- Implemented an AI-based matching algorithm to connect surplus food donors with child care homes.
- Designed secure authentication and integrated image upload features for food verification.
- Improved system efficiency by ensuring accurate quantity-capacity matching between donors and recipients.

Event Management System – Mobile App

- Developed using Flutter, Dart, and Firebase for seamless cross-platform performance.
- Enabled users to create, edit, and manage events with real-time data storage.
- Integrated Firebase Authentication for secure login and cloud storage for event photos.
- Enhanced user experience with responsive UI and smooth navigation.

Flight Booking System – Web App

- Created with HTML, CSS, JavaScript, PHP, Java, and JSP to handle online reservations.
- Implemented features like flight search, and booking confirmation.
- Connected with a database to manage booking records securely.

Life Below Water – Awareness Website

- Designed an educational platform using HTML, CSS, and JavaScript to raise awareness on ocean conservation.
- Included interactive UI components and resource links for students and educators.
